## SPECIAL INVITED PAPER

BHATTACHARYA, R. N. Refinements of the multidimensional central limit theorem and applications ..... 1–27

## ARTICLES AND SHORT COMMUNICATIONS

DE ACOSTA, ALEJANDRO. Asymptotic behavior of stable measures .. 494–499

ADLER, ROBERT J. Hausdorff dimension and Gaussian fields ..... 145–151

BABU, GUTTI JOGESH AND GHOSH, MALAY. Probabilities of moderate deviations for some stationary $\phi$-mixing processes ..... 222–234

BHATTACHARYYA, B. B. AND SEN, P. K. Weak convergence of the Rao-Blackwell estimator of a distribution function ..... 500–510

BLUM, J. R. AND REICH, J. I. On the individual ergodic theorem for $K$-automorphisms ..... 309–314

BLUM, J. R. AND SUSARLA, V. Estimation of a mixing distribution function ..... 200–209

BROCKETT, PATRICK L. Supports of infinitely divisible measures on Hilbert space ..... 1012–1017

CAIROLI, R. AND WALSH, J. B. Martingale representations and holomorphic processes ..... 511–521

CHAMBERLAIN, MICHAEL W. Last exit times from the boundary of a continuous time Markov chain ..... 152–156

CHAN, Y.-K. AND WIERMAN, JOHN. On the Berry-Esseen theorem for $U$-statistics ..... 136–139

CHUNG, K. L. AND GETOOR, R. K. The condenser problem ..... 82–86

ÇINLAR, ERHAN. Conversion of semimarkov processes to Chung processes ..... 180–199

COX, J. THEODORE. Entrance laws for Markov chains ..... 533–549

COX, J. THEODORE. On one-dimensional diffusions with time parameter set $(-\infty, \infty)$ ..... 807–813

DAVIES, P. LAURIE. The exact Hausdorff measure of the zero set of certain stationary Gaussian processes ..... 740–755

DIACONIS, PERSI. The distribution of leading digits and uniform distribution mod 1 ..... 72–81

DUDLEY, R. M. Wiener functionals as Itô integrals ..... 140–141

DUNCAN, RICHARD. Pointwise convergence theorems for self-adjoint and unitary contractions ..... 622–626

DURRETT, RICHARD T. AND IGLEHART, DONALD L. Functionals of Brownian meander and Brownian excursion ..... 130–135

DURRETT, RICHARD T., IGLEHART, DONALD L. AND MILLER, DOUGLAS R. Weak convergence to Brownian meander and Brownian excursion ..... 117–129

DYNKIN, E. B. Markov systems and their additive functionals ..... 653–677
EATON, MORRIS L. AND PERLMAN, MICHAEL D. Reflection groups, generalized Schur functions, and the geometry of majorization .... 829–860
ERICKSON, K. BRUCE. Slowing down $d$-dimensional random walks .. 645–651
FELDMAN, RICHARD M. Optimal replacement for systems governed by Markov additive shock processes ..... 413–429
FINE, TERRENCE L. AND KAPLAN, MICHAEL. Joint orders in comparative probability ..... 161–179
GABRIEL, JEAN-PIERRE. An inequality for sums of independent random variables indexed by finite dimensional filtering sets and its applications to the convergence of series ..... 779–786
GABRIEL, JEAN-PIERRE. Martingales with a countable filtering index set 888–898
GALAMBOS, JANOS. Bonferroni inequalities ..... 577–581
GETOOR, R. K. AND CHUNG, K. L. The condenser problem ..... 82–86
GHOSH, MALAY AND BABU, GUTTI JOGESH. Probabilities of moderate deviations for some stationary $\phi$-mixing processes ..... 222–234
GIANINI, JACQUELINE. The infinite secretary problem as the limit of the finite problem ..... 636–644
GILAT, DAVID. Every nonnegative submartingale is the absolute value of a martingale ..... 475–481
GILAT, DAVID AND SUDDERTH, WILLIAM. Timid play when large bets are profitable ..... 573–576
GRAY, LAWRENCE AND GRIFFEATH, DAVID. On the uniqueness and nonuniqueness of proximity processes ..... 678–692
GRAY, ROBERT M. AND PURSLEY, MICHAEL B. Source coding theorems for stationary, continuous-time stochastic processes ..... 966–986
GREENWOOD, PRISCILLA AND MONROE, ITREL. Random stopping preserves regular variation of process distributions ..... 42–51
GRIFFEATH, DAVID AND GRAY, LAWRENCE. On the uniqueness and nonuniqueness of proximity processes ..... 678–692
GZYL, HENRYK. Lévy systems for time-changed processes ..... 565–570
HAHN, MARJORIE G. Conditions for sample-continuity and the central limit theorem ..... 351–360
HAHN, MARJORIE G. AND KLASS, MICHAEL J. Sample-continuity of square-integrable processes ..... 361–370
HALÁSZ, G. AND MAJOR, P. Reconstructing the distribution from partial sums of samples ..... 987–998
HALL, PETER. Martingale invariance principles ..... 875–887
HALL, W. J. AND LOYNES, R. M. On the concept of contiguity ..... 278–282
HARRIS, T. E. A correlation inequality for Markov processes ..... 451–454
HEATH, DAVID. Interpolation of martingales ..... 804–806
HELMERS, R. The order of the normal approximation for linear combinations of order statistics with smooth weight functions ..... 940–953
HIPP, C. Edgeworth expansions for integrals of smooth functions .. 1004–1011

HOLST, LARS. Some asymptotic results for occupancy problems .... 1028–1035
HOPPE, FRED M. Representations of invariant measures on multitype Galton-Watson processes ..... 291–297
HWANG, F. K. A generalization of the Karlin-McGregor theorem on coincidence probabilities and an application to clustering ..... 814–817
IGLEHART, DONALD L. AND DURRETT, RICHARD T. Functionals of Brownian meander and Brownian excursion ..... 130–135
IGLEHART, DONALD L., MILLER, DOUGLAS R. AND DURRETT, RICHARD T. Weak convergence to Brownian meander and Brownian excursion ..... 117–129
ISMAIL, MOURAD E. H. Bessel functions and the infinite divisibility of the Student *t*-distribution ..... 582–585
JACOBSEN, M. AND PITMAN, J. W. Birth, death and conditioning of Markov chains ..... 430–450
JOSHI, V. M. An improved upper bound for standard *p*-functions .. 999–1003
DEL JUNCO, ANDRÉS. On the decomposition of a subadditive stochastic process ..... 298–302
KALIKOW, STEVEN. An entrance law which reaches equilibrium ..... 467–469
KAMAE, T., KRENGEL, U. AND O'BRIEN, G. L. Stochastic inequalities on partially ordered spaces ..... 899–912
KAPLAN, MICHAEL AND FINE, TERRENCE L. Joint orders in comparative probability ..... 161–179
KAPLAN, NORMAN. Two applications of a Poisson approximation for dependent events ..... 787–794
KERSTING, GÖTZ. Almost sure approximation of the Robbins-Monro process by sums of independent random variables ..... 954–965
KHALILI, SIAMAK. On the oscillation of the Brownian motion random measure ..... 142–144
KLASS, MICHAEL J. and HAHN, MARJORIE G. Sample-continuity of square-integrable processes ..... 361–370
KLASS, MICHAEL AND TEICHER, HENRY. Iterated logarithm laws for asymmetric random variables barely with or without finite mean 861–874
KLINCSEK, G. A square function inequality ..... 823–825
KRENGEL, U., O'BRIEN, G. L. AND KAMAE, T. Stochastic inequalities on partially ordered spaces ..... 899–912
LAI, TZE LEUNG. First exit times from moving boundaries for sums of independent random variables ..... 210–221
LAI, TZE LEUNG. Convergence rates and *r*-quick versions of the strong law for stationary mixing sequences ..... 693–706
LANDERS, D. AND ROGGE, L. Inequalities for conditioned normal approximations ..... 595–600
LANDERS, DIETER AND ROGGE, LOTHAR. A counterexample in the approximation theory of random summation ..... 1018–1023
LEHOCZKY, JOHN P. Formulas for stopped diffusion processes with

stopping times based on the maximum ..... 601–607
LETAC, GÉRARD. Recurrence for products of renewal sequences .... 591–594
LIGGETT, THOMAS M. Ergodic theorems for the asymmetric simple exclusion process II ..... 795–801
LINDVALL, TORGNY. A probabilistic proof of Blackwell's renewal theorem ..... 482–485
